

## Erasure processes made easy.

**JUST REGISTER AND GET STARTED.** Deletion, management and verification of any number of erasure processes are a breeze with hosted erase.

Ontrack HostedErase enables the simple execution and centralised management of all your erasure processes including detailed reports under a common web interface.

### Ontrack HostedErase: Simple and well-documented deletion

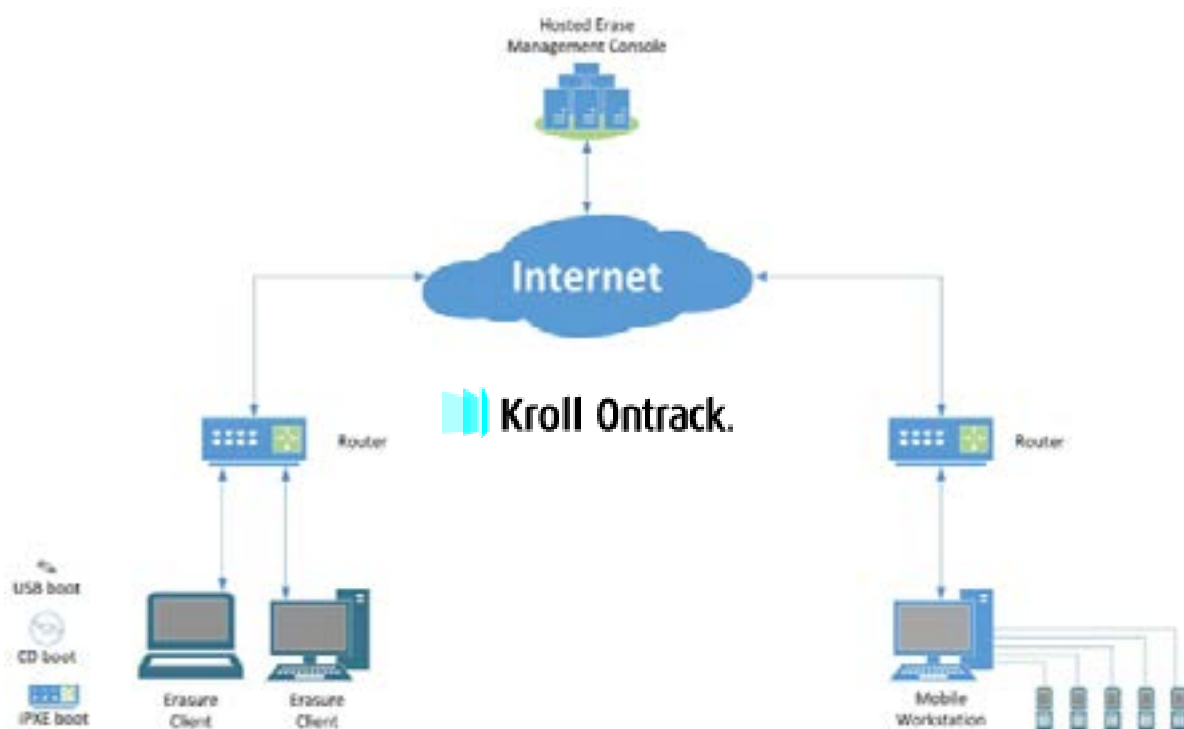

- Centralised web management of all your deletion processes
- Completed erasures of the connected computers and handheld devices are transmitted and recorded
- No need for separate installation or operation of web servers or SQL databases
- Simple online management of expired licences without installation of HASP key or licence manager
- Simple installation of Blancco erase software on the user machines to securely delete data from computers and mobile devices
- Erase client supports Blancco 5 and Blancco Mobile, the leading solutions for secure deletion
- Simply select available erasure options through the erase client

## Centrally manage user rights and licences

- Centralised administration, control and allocation of user rights
- Administration and control of all used and available licences
- Purchased licences are available for immediate use

## Comprehensive reporting of erasure processes

- Management of all the reports for your completed erasures and their processes
- Complete verification of proper erasure of all data in accordance with internal and external policies, laws and regulations
- Reports can be saved as in CSV, PDF and XML format for further processing
