IT Manager (Dev Ops)
Location: Katowice

Wondering how your work will look like?

Imagine that you… Are responsible for hiring and building a new team ✳ Provide leadership to a small team located in local and remote offices ✳ Act as a point of contact for IT staff ✳ Own and drive initiatives around continuous improvement, quality, software build automation, and continuous integration and release ✳ Evaluate the technology stack, constraints, and dependencies to introduce tools, frameworks and strategies that provide maximum automation during deployment ✳ Use English every day in communication with native speakers

Requirements:

- Minimum 4 years' experience of progressive leadership experience in setting technology strategy, software development, engineering, and operations
- Minimum 2 years' experience leading software teams in an Agile environment and leveraging continuous integration, continuous delivery, and continuous deployment practices
- Demonstrated background in applying best practices to automate release, development and operational processes.
- Experience and knowledge of build tools like Maven and continuous integration tools like Jenkins or TFS.
- Solid understanding of configuration management and version control using SVN, Git, Stash, TFS etc.
- Experience working with AWS cloud platform and cloud automation tools like Chef, Puppet, Salt etc.
- Scripting experience in any of the most common scripting languages like PowerShell, perl, Python, ksh, ssh, etc.
- Excellent leadership skills and respectful approach to different opinions
- Strong analytical and problem solving skills
- Very good knowledge of English and excellent communication skills including written, verbal and listening.
- Ability to work autonomously in fast pace environment

Nice to have:

- Previous DevOps experience
- Previous exposure to budget management
- Project management experience

We offer:
